TREALERS COMMOND MINES.

Func 16.—The lode in the eighty cast of Cariston is in two parts, about two fest wide, worth 161, per fathom. The wines under the seventy end in predicting stones of one. In the wines under the sixty, in inegs and crey, and has a kindly appearance. In the wines under the sixty, in inegs and crey, and has a kindly appearance. The sixty west is twenty inches wide, more kindly when it has been; the sixty end is two and a half feet wide, with bet little mineral. The fifty west to a present small, but premissing seen to improve. The facty-four west is worth 161, per fathom.

GREAT WHEAL MATHA COMMONDATED MINES.

June 6.—In the sixty fathom irrel, east of the shaft, the lode is two feet wide, composed of spar, numefic, and caped, impregnated with over; guing west in the same lived, it is still large—six feet of which is aveing work. In the fifty fathom irrel west the hole is somewhat improved, and shout four feet wide, composed of mondie and capel—producing good stones of ore. In the facty fathom level wast we have intersected a cross course, which has rather disordered the lode for the present. The lode in the add level is two feet wide, composed of peans and agar, with some biack and yellow our. At the lower mine Thomas's shaft is now elevan fathoms, and the men are now culting a pint. Recreami's inde, in Rysii's chaft, is now there feet wide, composed of mundle and ore—exting work.
